Worldwide Refinery Construction Outlook

The Worldwide Refinery Construction Outlook (WRCO) provides an independent assessment of global refinery projects, regional refining capacity growth, and downstream investment trends impacting future petroleum product supply and refining competitiveness. Published semi-annually, industry experts integrate TM&C's distinctive market outlooks, refinery expertise, and global project tracking capabilities to deliver actionable insight into evolving refining markets, capital investment trends, and regional supply dynamics.

Key Features:

- Global refinery construction and expansion project tracking by region and refinery configuration
- Analysis of refining capacity additions, closures, delays, capex spend, and project completion outlooks
- Assessment of regional refining competitiveness, investment economics, and construction cost trends
- Evaluation of downstream investment trends impacting global product balances and trade flows
- Strategic insights into refining configuration shifts, clean fuels investments, and petrochemical integration trends
- Analysis of refinery projects across North America, the Middle East, Asia-Pacific, Latin America, Africa, and Europe

Table of Contents

Worldwide Refinery Construction Outlook

- Probability Index
- Major Project Developments – Status Updates on Key Projects
- New Projects Still Not Emerging
- Downstream – Trend Towards Distillates
- Refinery Construction Outlook

Appendices

Appendix 1 – Announced Refinery Construction Projects

Appendix 2 – Probable Refinery Construction Projects
